

9th meeting of the UNCTAD Advisory Group on “Developing skills, knowledge and capacities through innovation: e-Learning, m-Learning , Cloud Learning”

Mobile learning at ITC-ILO

The combination of mobile devices and an increasingly connected world is transforming how and when people learn, expanding education beyond the classroom. ITC-ILO is adapting by using mobile tools to create engaging, shared, interactive learning experiences.

Mobile learning can extend ITC-ILO’s existing training into diverse contexts, through a broader range of interactions with people and with content.

The aim of this presentation is to provide an overview of the ITC-ILO evolving Mobile Learning story, since its origins in 2009 until more recent updates taking place in 2013 and beyond.

The origins and the first pilot	ITC-ILO institutional mobile learning
 <p>Mobile Learning for Africa and the MyCoop Mobile Learning Toolkit for Trainers.</p>	 <p>ITC-ILO mobile learning stories and concrete examples exploring how we can make learning accessible ‘anytime’ and ‘anywhere’ beyond the physical borders of a training room.</p>
Latest updates	What’s next?
 <p>Mobile learning for young entrepreneurs in East Africa.</p>	 <p>m-Workplace learning, or how mobile can meet workplace learning needs by combining the delivery of micro content that leads to social and collaborative, therefore effective learning.</p>
